

MOHAMMAD SINAN

UI Engineer · Frontend Architecture · Design Systems

Riyadh, Saudi Arabia · +966508099866 · mhdsinan004@gmail.com · [sinankota.netlify.app](#) · [linkedin.com/in/mohammad-sinan](#)

PROFESSIONAL SUMMARY

UI Engineer with enterprise experience developing responsive, accessible, and pixel-perfect web interfaces for government digital platforms and enterprise applications. Currently contributing to frontend UI development at the Saudi Broadcasting Authority (SBA) in Riyadh, working within the DGA Design System framework and translating Figma designs into production-ready interfaces across ASP.NET Web Forms environments. Proficient in React.js, Vue.js, Tailwind CSS, and Bootstrap, with a strong foundation in component architecture, reusable UI systems, and design-to-code execution. Experienced in building RTL-compatible, Arabic-localized interfaces for Saudi and GCC markets, integrating REST APIs, and maintaining scalable CSS architecture across responsive, cross-browser environments. Collaborative across design, backend, and stakeholder teams to deliver maintainable, accessible, and government-ready digital experiences.

TECHNICAL SKILLS

Frontend: HTML5 · CSS3 · JavaScript (ES6+) · React.js · Vue.js (Options API) · Tailwind CSS · Bootstrap · Semantic HTML · Responsive Web Design · CSS Grid · Flexbox · Cross-Browser Compatibility · RTL Support · Design Systems

UI Engineering: Component Architecture · Reusable Components · Design-to-Code · Pixel-Perfect Development · Arabic Localization · Wireframing · Prototyping · Accessibility · Performance Optimization

ASP.NET (Frontend): ASP.NET Web Forms — frontend implementation · Styling Web Forms controls with modern CSS · Frontend integration within ASP.NET projects · UI enhancement without backend modification

Design & Tooling: Figma · DGA Design System · Adobe Photoshop · Canva · Git · GitHub · VS Code · AI-Assisted Development

Backend & Data: Python · Firebase · REST APIs · MySQL

PROFESSIONAL EXPERIENCE

UI Developer · [Saudi Broadcasting Authority \(SBA\)](#) | Riyadh, Saudi Arabia

Current

- Developing responsive, accessible user interfaces for enterprise government web applications following DGA Design System standards and translating Figma designs into production-ready frontend code
- Building and maintaining reusable frontend components within ASP.NET Web Forms projects, applying modern HTML5, CSS3, and JavaScript to style and enhance existing controls without affecting backend logic
- Implementing Arabic RTL layouts and ensuring cross-browser, cross-device consistency across desktop, tablet, and mobile viewports
- Collaborating with UI/UX designers, backend developers, and stakeholders to align frontend delivery with enterprise product requirements and government design guidelines

Software Developer · [Almasons](#) | Mangalore, India

Jun 2025 – Nov 2025

- Built cockpit and dashboard interfaces using Vue.js and Tailwind CSS, delivering responsive layouts across desktop and tablet operational workflows
- Integrated real-time Python and MySQL APIs into the frontend data layer, improving live data accuracy and rendering reliability for operational dashboards
- Refactored UI into reusable, modular Vue components, reducing code duplication and improving long-term maintainability across the application

Graphic & UI Designer · [Whitebook World](#) | Bangalore, India

Oct 2024 – May 2025

- Designed professional album layouts and marketing creatives in Figma, aligning typography, spacing, and visual hierarchy with client brand standards
- Delivered pixel-perfect layout revisions across digital and print touchpoints, reducing revision cycles through systematic color correction and retouching workflows

Freelance UI & Visual Designer · [Self-Employed](#) | Remote

Jun 2022 – Present

- ▶ Delivered 30+ design assets including logos, banners, and social media creatives for clients across multiple industries
- ▶ Maintained consistent design quality across all deliverables through structured retouching, color correction, and layout alignment workflows

PROJECTS

PixelResume — [React.js](#) · [Tailwind CSS](#) · [Firebase](#) · [RTL Support](#) · [PDF Export](#)

- ▶ Problem: Job seekers in Arabic-speaking markets lacked a resume builder with native RTL support and ATS-compliant PDF output, forcing workarounds in tools not designed for Arabic content
- ▶ Engineered a full-featured resume builder with real-time live preview, modular section editing, and one-click ATS-compliant PDF export — purpose-built for the Middle East hiring market
- ▶ Architected a component library of reusable, composable UI modules (form inputs, preview panels, export controls) optimized for performance and cross-browser consistency
- ▶ Implemented complete RTL/LTR toggle with dynamic layout adaptation, enabling Arabic and English resume creation from a single interface
- ▶ Outcome: Delivered a production-ready tool solving a real hiring problem with clean component architecture, responsive design, and bilingual UI support

AI Pixel Hub — [React.js](#) · [Firebase](#) · [Responsive Design](#) · [Search & Filter UI](#)

- ▶ Problem: The AI tools landscape was fragmented and hard to navigate — users needed a structured discovery interface, not another unfiltered directory
- ▶ Developed a responsive AI tools discovery platform with structured navigation, categorized browsing, and search functionality to surface relevant tools quickly
- ▶ Built performance-optimized rendering with clean component separation, ensuring fast load times and cross-browser consistency across devices
- ▶ Designed a scalable content architecture capable of expanding the tool catalog without UI restructuring

AI SaaS Landing Page Builder — [React.js](#) · [TypeScript](#) · [Tailwind CSS](#) · [Component Architecture](#)

- ▶ Problem: Teams evaluating AI-powered SaaS products lacked a centralized interface for comparing landing page templates and feature sets side by side
- ▶ Built a dynamic frontend interface for exploring and comparing AI-powered SaaS landing page templates, improving decision-making speed through centralized comparison UI
- ▶ Engineered scalable, reusable UI components in TypeScript, enforcing type safety and enabling consistent styling across template variants
- ▶ Implemented responsive layout system using Tailwind CSS utility classes, ensuring polished rendering across all viewport sizes and device categories

EDUCATION

Bachelor of Computer Applications (BCA)

Graduated Aug 2024

St. Mary's Syrian College, Mangalore University [CGPA: 7.98 / 10](#)

CERTIFICATIONS

Full Stack Python Developer

2024

Besant Technologies, Bangalore
